Yates, A., 171

Construction Management and Economics, 1991, **9**, 579–584

Subject index

Accuracy, learning, experience, feedback, stable, development, asterisk, design cost estimating, 133
Advanced construction technologies, management systems, microcomputers, technology evaluation, 39
Adverse selection, building procurement, contracts, cost-plus contracting, cash flow, project scheduling, uncertainty, 481
Asterisk, design cost estimating, accuracy, learning, experience, feedback, stable, development, 133

Bidding, tendering, statistical models, 403
Budget, cost, cash flow, construction, time, performance, duration, regression, 383
Building procurement, contracts, cost-plus contracting, cash flow, project scheduling, uncertainty, adverse selection, 481

Carpenters, communication, construction, foremen, planning, productivity, 565
Cash flow, construction, time, performance, duration, regression, budget, cost, 383
Cash flow, project sheduling, uncertainty, adverse selection, building procurement, contracts, cost-plus contracting, 481
Cash flow, stochastic time series forecasting indices, inflation, escalation, 187
Cashflow forecasting, mathematical modelling, growth curves, project financial management, 113
Classification, review, cost modelling, research, 97
Clients, professional services, marketing orientation, implementation, 355
Clients, project management, contracts, organizations, 327
Communication, construction, foremen, planning, productivity, carpenters, 565
Company performance, international construction, foreign contracting, international competition, 431
Company size, turnover growth, diversification, pricing policies, profitability, 311
Computer-aided estimating, expertise, estimators' tasks, 543
Computer model, cost model, concrete construction, structural systems, economic evaluation, cost estimation, 205
Computing, construction equipment, earthmoving, expert systems, 263
Conceptual model, labour demand, labour supply, manpower planning, diagnostic model, construction industry, 451
Concrete construction, structural systems, economic evaluation, cost estimation, computer model, cost model, 205
Construction, contract administration, contracts, incentives, risk sharing, 157
Construction, foremen, planning, productivity, carpenters, communication, 565
Construction, time, performance, duration, regression, budget, cost, cash flow, 383
Construction equipment, earthmoving, expert systems, computing, 263
Construction industry, conceptual model, labour demand, labour supply, manpower planning, diagnostic model, 451
Construction projects, evaluation, selection, investment criteria, 51
Construction projects, Middle East, effectiveness, style, workforces, site managers, cultural differences, 79
Construction sector, Singapore, information technology, strategic planning, 509
Contract administration, contracts, incentives, risk sharing, construction, 157

Contracting, developing countries, operating environment, problems, contractor development programmes, 19
Contracting, project organization, organizational behaviour, management, 247
Contractor development programmes, contracting, developing countries, operating environment, problems, 19
Contractors, cost commitment curves, reliability, net cashflow models, tendering, 291
Contracts, cost-plus contracting, cash flow, project scheduling, uncertainty, adverse selection, building procurement, 481
Contracts, incentives, risk sharing, construction, contract administration, 157
Contracts, organizations, clients, project management, 327
Cost, cash flow, construction, time, performance, duration, regression, budget, 383
Cost commitment curves, reliability, net cashflow models, tendering, contractors, 291
Cost-estimating, software selection, knowledge-based expert systems, quantity takeoff, 369
Cost estimation, computer model, cost model, concrete construction, structural systems, economic evaluation, 205
Cost model, concrete construction, structural systems, economic evaluation, cost estimation, computer model, 205
Cost modelling, research, classification, review, 97
Cost-plus contracting, cash flow, project scheduling, uncertainty, adverse selection, building procurement, contracts, 481
Cultural differences, construction projects, Middle East, effectiveness, style, workforces, site managers, 79
Culture, organization, small groups, performance, 219

Databases, knowledge representation techniques, project analysis and control, project development procedures, expert systems, 529
Decision analysis, decision trees, Monte Carlo simulation, probability, risk analysis, utility theory, 171
Decision trees, Monte Carlo simulation, probability, risk analysis, utility theory, decision analysis, 171
Design cost estimating, accuracy, learning, experience, feedback, stable, development, asterisk, 133
Deterministic framework, upper bound on expenditure, fast-track construction, economic analysis, 467
Developing countries, operating environment, problems, contractor development programmes, contracting, 19
Development, asterisk, design cost estimating, accuracy, learning, experience, feedback, stable, 133
Diagnostic model, construction industry, conceptual model, labour demand, labour supply, manpower planning, 451
Diversification, pricing policies, profitability, company size, turnover growth, 311
Duration, regression, budget, cost, cash flow, construction, time, performance, 383

Earthmoving, expert systems, computing, construction equipment, 263
Economic analysis, deterministic framework, upper bound on expenditure, fast-track construction, 467
Economic development, marketing research, international construction, 63, 73
Economic evaluation, cost estimation, computer model, cost model, concrete construction, structural systems, 205
Effectiveness, style, workforces, site managers, cultural differences, construction projects, Middle East, 79
Escalation, cash flow, stochastic time series forecasting indices, inflation, 187
Estimators' tasks, computer-aided estimating, expertise, 543
Evaluation, selection, investment criteria, construction projects, 51
Experience, feedback, stable, development,

asterisk, design cost estimating, accuracy, learning, 133
Expertise, estimators' tasks, computer-aided estimation, 543
Expert systems, computing, construction equipment, earthmoving, 263
Expert systems, databases, knowledge representation techniques, project analysis and control, project development procedures, 529

Fast-track construction, economic analysis, deterministic framework, upper bound on expenditure, 467
Feedback, stable, development, asterisk, design cost modelling, accuracy, learning, experience, 133
Foreign contracting, international competition, company performance, international construction, 431
Foremen, planning, productivity, carpenters, communication, construction, 565

Growth curves, project financial management, cashflow forecasting, mathematical modelling, 113

Highways, maintenance, roadwork contracts, tendering, 151

Implementation, clients, professional services, marketing orientation, 355
Incentives, risk sharing, construction, contract administration, contracts, 157
Inflation, escalation, cash flow, stochastic time series forecasting indices, 187
Information management, project information, information retrieval, relational databases, 231
Information retrieval, relational databases, information management, project information, 231
Information technology, strategic planning, construction sector, Singapore, 509
International competition, company performance, international construction, foreign contracting, 431
International construction, economic development, marketing research, 63, 73
International construction, foreign contracting, international competition, company performance, 431
Investment criteria, construction projects, evaluation, selection, 51

Knowledge-based expert systems, quantity take-off, cost-estimating, software selection, 369
Knowledge representation techniques, project analysis and control, project development procedures, expert systems, databases, 529

Labour demand, labour supply, manpower planning, diagnostic model, construction industry, conceptual model, 451
Labour supply, manpower, planning, diagnostic model, construction industry, conceptual model, labour demand, 451
Learning, experience, feedback, stable, development, asterisk, design cost estimating, accuracy, 133

Maintenance, roadwork contracts, tendering, highways, 151
Management, contracting, project organization, organizational behaviour, 247
Management contracting, objectives, project performance, 343
Management systems, micro-computers, technology evaluation, advanced construction technologies, 39
Manpower planning, diagnostic model, construction industry, conceptual model, labour demand, labour suppiy, 451
Marketing orientation, implementation, clients, professional services, 355
Marketing research, international construction, economic development, 63, 73
Mathematical modelling, growth curves, project financial management, cashflow forecasting, 113

Micro-computers, technology evaluation, advanced construction technology, management systems, 39
Middle East, effectiveness, style, workforces, site managers, cultural differences, construction projects, 79
Monte Carlo simulation, probability, risk analysis, utility theory, decision analysis, decision trees, 171

Net cashflow models, tendering, contractors, cost commitment curves, reliability, 291

Objectives, project performance, management contracting, 343
Operating environment, problems, contractor development programmes, contracting, developing countries, 19
Organization, small groups, performance, culture, 219
Organizational behaviour, management, contracting, project organization, 247
Organizations, clients, project management, contracts, 327

Performance, culture, organization, small groups, 219
Performance, duration, regression, budget, cost, cash flow, construction, time, 383
Planning, productivity, carpenters, communication, construction, foremen, 565
Planning, waste treatment, plant costs, 553
Plant costs, planning, waste treatment, 553
Pricing policies, profitability, company size, turnover growth, diversification, 311
Probability, risk analysis, utility theory, decision analysis, decision trees, Monte Carlo simulation, 171
Problems, contractor development programmes, contracting, developing countries, operating environment, 19
Productivity, carpenters, communication, construction, foremen, planning, 565
Professional services, marketing orientation, implementation, clients, 355
Profitability, company size, turnover growth, diversification, pricing policies, 311
Project analysis and control, project development procedures, expert systems, databases, knowledge representation techniques, 529
Project development procedures, expert systems, databases, knowledge representation techniques, project analysis and control, 529
Project financial management, cashflow forecasting, mathematical modelling, growth curves, 113
Project information, information retrieval, relational databases, information management, 231
Project management, contracts, organizations, clients, 327
Project managment goals, risk drivers, risk analysis, risk factors, project risk profile, risk action review, risk action management, responsibilities, project risk areas, 3
Project organization, organizational behaviour, management, contracting, 247
Project performance, management contracting, objectives, 343
Project risk areas, project management goals, risk drivers, risk analysis, risk factors, project risk profile, risk action review, risk action management, risk management responsibilities, 3
Project risk profile, risk action review, risk action management, risk management responsibilities, project risk areas, project management goals, risk drivers, risk analysis, risk factors, 3
Project scheduling, uncertainty, adverse selection, building procurement, contracts, cost-plus contracting, cash flow, 481

Quantity take-off, cost-estimating, software selection, knowledge-based expert systems, 369

Regression, budget, cost, cash flow, construction, time, performance, duration, 383
Relational databases, information management, project information, information retrieval, 231
Reliability, net cashflow models, tendering, contractors, cost commitment curves, 291
Research, classification, review, cost modelling, 97
Review, cost modelling, research, classification, 97
Risk, uncertainty, subcontract conditions, subcontractors, 495
Risk action management, risk management responsibilities, project risk areas, project management goals, risk drivers, risk analysis, risk factors, project risk profile, risk action review, 3
Risk action review, risk action management, risk management responsibilities, project risk areas, project management goals, risk drivers, risk analysis, risk factors, project risk profile, 3
Risk analysis, risk factors, project risk profile, risk action review, risk action management, risk management responsibilities, project risk areas, project management goals, risk drivers, 3
Risk analysis, utility theory, decision analysis, decision trees, Monte Carlo simulation, probability, 171
Risk drivers, risk analysis, risk factors, project risk profile, risk action review, risk action management, risk management responsibilities, project risk areas, project management goals, 3
Risk factors, project risk profile, risk action review, risk action management, risk management responsibilities, project risk areas, project management goals, risk drivers, risk analysis, 3
Risk management responsibilities, project risk areas, project management goals, risk drivers, risk analysis, risk factors, project risk profile, risk action review, risk action management, 3
Risk sharing, construction, contract administration, contracts, incentives, 157
Roadwork contracts, tendering, highways, maintenance, 151

Selection, investment criteria, construction projects, evaluation, 51
Singapore, information technology, strategic planning, construction sector, 509
Site managers, cultural differences, construction projects, Middle East, effectiveness, style, workforces, 79
Small groups, performance, culture, organization, 219
Sofware selection, knowledge-based expert systems, quantity take-off, cost-estimating, 369
Stable, development, asterisk, design cost estimating, accuracy, learning, experience, feedback, 133
Statistical models, bidding, tendering, 403
Stochastic time series forecasting indices, inflation, escalation, cash flow, 187
Strategic planning, construction sector, Singapore, information technology, 509
Structural systems, economic evaluation, cost estimation, computer model, cost model, concrete construction, 205
Style, workforces, cultural differences, construction projects, Middle East, effectiveness, 79
Subcontract conditions, subcontractors, risk, uncertainty, 495
Subcontractors, risk, uncertainty, subcontract conditions, 495

Technology evaluation, advanced construction technologies, management systems, micro-computers, 39
Tendering, contractors, cost commitment curves, reliability, net cashflow models, 291
Tendering, highways, maintenance, roadwork contracts, 151
Tendering, statistical models, bidding, 403
Time, performance, duration, regression, budget, cost, cash flow, construction, 383

Turnover growth, diversification, pricing policies, profitability, company size, 311

Uncertainty, adverse selection, building procurement, contracts, cost-plus contracting, cash flow, project scheduling, 481
Uncertainty, subcontract conditions, subcontractors, risk, 495
Upper bound on expenditure, fast-track construction, economic analysis, deterministic framework, 467
Utility theory, decision analysis, decision trees, Monte Carlo simulation, probability, risk analysis, 171

Waste treatment, plant costs, planning, 553
Workforces, site managers, cultural differences, construction projects, Middle East, effectiveness, style, 79
